Projects

DG Loan App

DG Loan App is a kind of company CRM system. This app helps a client to manage their all loans, EMI, and Customer Details. where the company handles all configurations related to their customer and loans.

Features

- Users can be admins and Manager
- Admin and manager can add, update, and find loans, EMIs, Customers, etc.
- only the admin can approve then the loan will become running stage.
- Admin and manager can use pay EMI & settled loan feature.
- Main account feature where users see wallet balance, capital, drawing, payment and receipts Ac balance.
- Users can initiate capital, drawing, payment & receipt, transactions in the account.
- Transaction History Feature.
- Sort Customers, loans, and EMIs in ascending and descending order for all columns AND Global filter feature where user can search any value using one search box in whole Data.
- Users can download all data in an Excel file that is shown in tables for customers, loans and EMIs.
- User authentication using spring security (JWT)

Areas of responsibility:

- All the features were developed on my own

Tech-Stack: Java | Spring-boot | Railway | Hibernate | MySQL | React.Js | Spring-MVC | Maven | Postman | Spring-JPA | Spring Security | Tailwind CSS | Tanstack Table | POstman | Intellij-idea | Ohter react Library
